Green Initiatives

Integration of Bio – Diesel into our fleet

We are working on introducing bio diesel to smaller segment trucks and for Domestic Haulage which will significantly lessen the pollutants thereby helping us in taking our Green Initiatives to a whole new level

Solar Panels In our Warehouses

Solar Panels are being installed in both our warehouses inside Jafza which will reduce our carbon footprint significantly

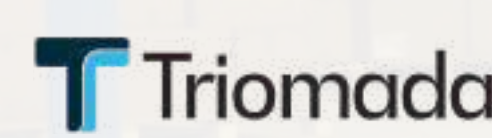

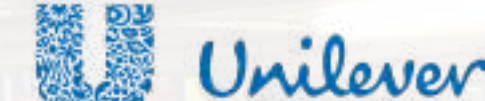

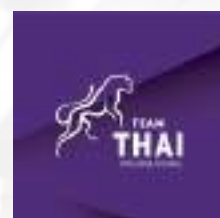

Digitization

We are digitizing our last mile delivery distribution to a completely paper less model through the introduction of POD systems and Optimization engines
